GLAD ACRES

(G. V. SNYDER)

8386 DIVISION RD.

RICHMOND, MICHIGAN

All American Glads

These are the new All American Glad Winners that have been selected for outstanding vigor and beauty in over 30 trial gardens around the country.

CARIBBEAN (376—E) The delicate blue tones of this exciting novelty present an unusual combination of rare blue-violet petals handsomely embellished by a rich, deep violet throat and a small cream spear. CARIBBEAN opens from 9 to 11 precisely styled florets at one time in formal, double-row placement. It possesses a quality uncommon to many varieties and almost a rarity among "so-called blue glads", that of extreme vigor. In every way, CARIBBEAN displays top performance. It consistently produces tall, well-proportioned spikes and unusually healthy bulbs. It is the first distinctly ruffled blue-violet gladiolus. Every flower lover will want this striking novelty in his garden. Its refreshing beauty will make it a sure-fire winner in its class at flower shows.

MAYTIME (442—E) A light-hearted charm surrounds this brightly colored glad. The gracefully ruffled deep, pure pink florets with their contrasty large white throats bring back the memory of the freshness of May-blooming flowers. MAYTIME is a lithesome glad of good height. It readily opens 8 to 10 florets on spikes of five and one-half feet tall. A robust grower, MAYTIME has wonderful plant health and makes fine, plump bulbs. You will love MAYTIME for its long ribbon of color, for the silky taffeta sheen of its petals, and for its remarkable ease of growth. An ideal flower for either cutting or exhibition and a gem for the home garden.

APPLEBLOSSOM (460—E) A gladiolus of the utmost delicacy of coloring, the predominating hue being snowy white with a faint touch of cream in the throat and an exquisite flush or corona of cool rose pink at the edges of the petals. Up to eight or ten trimly tailored florets, about five inches in diameter and of very heavy substance, are open at a time on spikes up to five feet tall. APPLEBLOSSOM will give you a new conception of gladiolus beauty when it blooms in your garden.

ROYAL STEWART (450—EM) A truly remarkable new gladiolus variety that has been widely acclaimed for its consistently fine performances under an extensive test program throughout the United States and Canada. The lightly ruffled florets are five inches in diameter and are of good substance. They are a clear light red and the long flower-heads frequently carry up to twelve flowers open at one time. Growth is vigorous and healthy, with the total height of the plants running about five feet. ROYAL STEWART has proved to be an outstanding winner of top awards.

The right to reproduce the All-America varieties for resale purposes or to sell cut flowers is reserved.

All 4 varieties are priced for large bulbs only
50c ea. 12 for \$5.00, any combination or one variety.
Special collection, one of each variety \$1.75.

Introducing

NEW BEAUTIES

for 1957

From J. W. HARRIS, Sarnia, Ontario

CORAL ROSE (462) A TERRIFIC GLAD in every way. A beautiful shade of coral rose, with slightly deeper throat. All buds are in color at once, opens 10 easily, balance all in color, heavily ruffled, texture like leather, has been scored up to 92 by competent judges, and was supposed to be introduced at \$5.00 for any size bulb. It is an excellent propagator, and will therefore be introduced at a popular price. Field height, 56".

MARCO POLO (507) Like the Giant in history, this huge cream, with cerise throat marks, has texture like cordovan leather, grows 66" to 72" tall with 21 buds, which open 10 with 11 in color. Stands heat, rain, wind, like armor plate. Dwarfs everything else in the field. Has been scored up to 92 in seedling shows. If you want a real giant glad, with class and finish, here is your glad.

Above varieties: Large \$3.00; Medium \$2.00; Small \$1.00

Blts. 35c ea. or 3-\$1.00

With the purchase of one bulb each, of the above two, or two of either variety at retail, you will be presented with one bulb, of the same size as purchased, of ATLANTIC DAWN. This is a tall blue gray sport of Eliz. the Queen, with a cerise throat, which grows 56" tall, a very attractive sport of the Queen. Selected by Jack Harris, and will be introduced at popular prices in 1958.

From JIM KYDD, Verdun, Quebec

FLORADORA (406) The sensational release of the year, and one of the finest exhibition glads ever introduced. A magnificent large creamy white, deepening to cream in the throat, on which appear a few red marks. Attains a field height of 60", flowerhead 28" to 32", with 22 to 24 buds, opens 8 easily, blooms midseason, excellent attachment, unusually healthy, produces grand bulbs, and is a rapid propagator.

Large \$3.00; Medium \$2.00; Small \$1.00; Blts. 10 for \$3.00

Sold only with the purchase of a bulb

To Friends, Old and New;

We are bringing you this year a slightly different catalog. Our descriptions are briefer, more to the point, and we have omitted pictures. However we have in no other way curtailed our business. Our bulbs are the same high quality, and possibly, due to excellent digging conditions, better than ever. Most of our stock has been cleaned, graded, and counted and we are in a position to give better-than-ever service. We can, of course, ship no earlier than weather conditions permit, and if we err on the side of caution, we know you would prefer that, to having bulbs frozen in transit.

To new readers of our catalog, this is our 15th issue and each year we have endeavored to improve and we feel that in the point of varieties offered and quality of bulbs we have been successful.

Some times in the press of work it becomes hard to maintain enthusiasm but when the blooming season is with us again and we see such beautiful varieties as bloomed for us this past year and realize what improvements have been made over the years, we are glad that we have made the growing of gladiolus our life work. We know that if you are a beginner it will not be long until you feel as we do. We urge you to make it a point to attend any available Glad Shows and to compare your flowers with your neighbor's. We feel sure that there is no other flower which can give so much satisfaction and beauty as do the newer gladiolus. They have a range of color far exceeding that of any other flower. In popularity they have taken over the number one spot which had been held by the rose.

We look forward to continued improvement and know that it is on you who buy bulbs, you who grow gladiolus because of admiration for a beautiful flower, that much of this improvement depends.

We wish you a most successful and satisfactory glad year in 1957.

Sincerely,

G. V. Snyder

General List

Please note

On bulbs priced per each, 3 bulbs can be purchased for $2\frac{1}{2}$ times the price of one; 5 at 4 times the price of one. Where bulbs are priced at 2, 3 or 5 for a certain amount this is the minimum amount sold and we cannot fill orders for lesser amounts.

Numerals and letters in parenthesis following variety name are as follows: First numbers denote size and color class. If in 500, blooms are $5\frac{1}{2}$ " or larger; in 400, blooms are $4\frac{1}{2}$ " to $5\frac{1}{2}$ "; in 300, blooms are $3\frac{1}{2}$ " to $4\frac{1}{2}$ ". Letter following denotes blooming time. E, is early, 70 to 80 days; M, is midseason or 80 to 90 days; L, late or over 90 days. Numerals following this denote year of introduction.

**SPECIAL CASH
DISCOUNT OFFER
FOR EARLY ORDERS**

We are offering a cash discount of 5% on all orders of \$5.00 or more postmarked not later than Feb. 20th, 1957. This offer does not include the All America Selections or the new 1957 Introductions, Special Collections, or quantity priced orders. It is only on bulbs from the General List and Standard Varieties. It is offered in order that we may spread our work in filling orders over a longer period as many folks wait until near spring to order and this makes it hard to give the best service.

LONG BLOOMING AND BULBLET SPECIALS

TERMS

Please read carefully

All orders must be accompanied by cash in full, or a 25% deposit will hold orders of \$5.00 or more for April delivery, balance to be sent before delivery.

Retail orders of \$3.00 or more are prepaid, less than \$3.00 must include 35c for postage and handling.

Quantity wholesale prices are net F.O.B. Richmond, Michigan. If your order contains both wholesale and retail items, unless you give instructions to the contrary we will ship them together F.O.B. and include extras or overcount to offset carrying charges on the retail items. Retail items are shipped when weather permits, usually starting in April.

GUARANTEE

We guarantee all bulbs and bulblets purchased from us to be certified stock, true to name, full size and free of disease. They are handled and grown under the most exacting conditions to meet certified standards. We do not guarantee germination of bulblets nor the crop you grow, as there are many conditions in growing over which we have no control. Our bulbs are rigidly inspected and certified by Michigan State inspectors guaranteeing finest quality

SIZE OF BULBS

Large bulbs are 1¼" in diameter or more.

Medium bulbs are ¾" to 1¼" in diameter.

Small bulbs are ¼" to ¾" in diameter.

Bulblets are the little hard shelled cormlets from which bulbs are grown.

REMEMBER —

We have the latest instructions for growing glads and for those of you that do not have a copy please ask for one with your order. As we always put liberal extras in your order we would be glad if you would make a few suggestions as to some you would like to try. We will attempt to follow your wishes as far as stocks are available.

ORDER EARLY

Ordering early assures you of getting the varieties you want, as later on certain sizes and varieties sell out. In appreciation of early orders we always put in more extras for this courtesy.

NOTICE REGARDING FUTURE CATALOGS.

We like everyone interested in glads to have our catalog, but due to high cost of printing, mailing, etc. unless we have an order within 2 years we must remove your name from our list. If you are not now interested in growing glads we would be happy if you would pass our catalog to a friend who might be interested.

Glad Growing Hints

PLANTING: Plant only clean healthy bulbs of good varieties. Do not fertilize heavily for glads; a little balanced fertilizer in the trench is all right if well mixed with the soil before planting. Plant in April, May, or early June in most localities; earlier in the southern states. Large and medium bulbs should be planted from 3 to 5 inches deep, and at least that far apart in the row. Plant small bulbs about 2 inches deep; bulblets only about an inch deep. We advise soaking all bulbs, just before planting, in a Lysol solution, 1 tablespoon Lysol to 1 gallon water. Soak for 3 or 4 hours and plant them the same day. The Lysol solution will not only kill any possible thrips on the bulbs, but it is also an effective fungicide to help keep the bulbs healthy.

CULTIVATING AND WATERING: Cultivate only enough to keep down weeds, or after rain or irrigation. Glads can use lots of moisture if drainage is good. In the absence of rain, a good soaking once or twice a week from the time the plants are 8 or 10 inches high until they bloom will work wonders. If impossible to irrigate, a mulch of a few inches of straw or other loose material will help hold moisture.

DIGGING AND STORAGE: About 5 or 6 weeks after they have bloomed, the bulbs will be ready to dig. Cut off the stems at once close to the bulbs. Keep the bulbs in a warm dry place with good air circulation for a few weeks, after which the old bulb and roots can be easily pulled off the bottom. Store the bulbs for the winter in a fairly cool dry place; a temperature of 40 to 55 degrees is ideal. Do not pile bulbs deeply; spread them out so air can circulate among them.

THRIPS: This very small insect can cause a lot of damage to gladiolus flowers if not held in check. If glads fail to open up properly, or appear "blasted" or disfigured with white marks, thrips are usually to blame. Thrips are found on various kinds of plants and weeds, so spraying or dusting is essential during the growing season, every 10 days or so from the time the plants are a few inches high until they bloom. Use 5% or 10% DDT for dusting; 50% wettable DDT for spraying. Thrips are really easy to control, but better be safe than sorry!
